## Finding Correct Exposure w/ Bracketing

Ingredients:

- Time Value Mode
- Auto exposure bracketing (AEB) mode
- Tripod

[ QUICK REF ]  
**Bracketing**

Not Sure of  
Exposure?  
Take several  
with AEB mode

---

Expose for a scene & your camera's light meter will select an aperture/shutter speed combination that it believes will give a proper exposure. Exposure bracketing means you are taking more pictures: some slightly under-exposed and some slightly over-exposed images. Most DSLRs have an auto exposure bracketing (AEB) mode to make this easier.
